About me

- Ecologist turned programmer
- Computer vision/ Evo alg
- bioarch

What we'll do

From R or Rstudio

- install devtools
- create github account
- lay out an R package within github
- build the package
- add help
- add C code library

Devtools

- A really handy package for developing packages
- Automates a lot of the process for you
- Available from CRAN:

```
$ install.packages("devtools")
```
